Explainable Graph Neural Networks & Hybrid Graph Databases for Brain Biomarker Discovery

Part 2: Pipeline Execution and Results

Animesh Basak (26911001)
Department of Computer Science & Engineering
Indian Institute of Technology Roorkee

M.Tech. / Ph.D. Course Project Presentation
November 2026

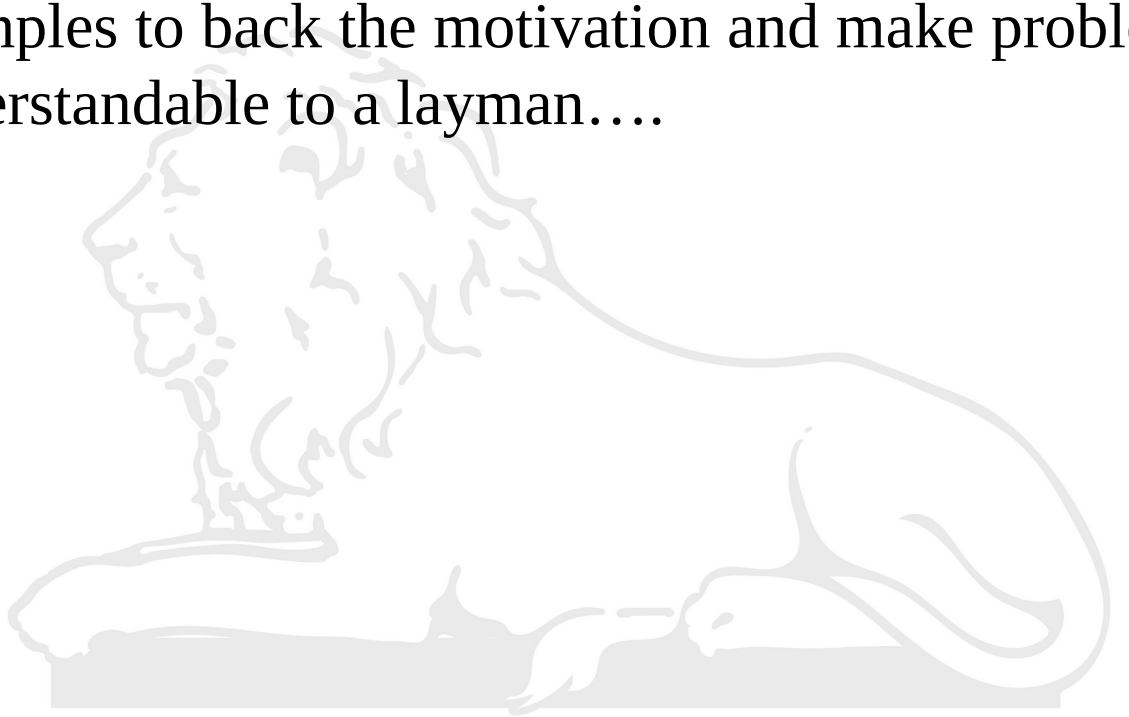

Outline

- Index for all slides of the PPT…..

Introduction

- Give **Motivation** for the work (*e.g.* trying to solve any real life problem to help human community)…..
- Give examples to back the motivation and make problem statement more understandable to a layman….

Introduction (1)

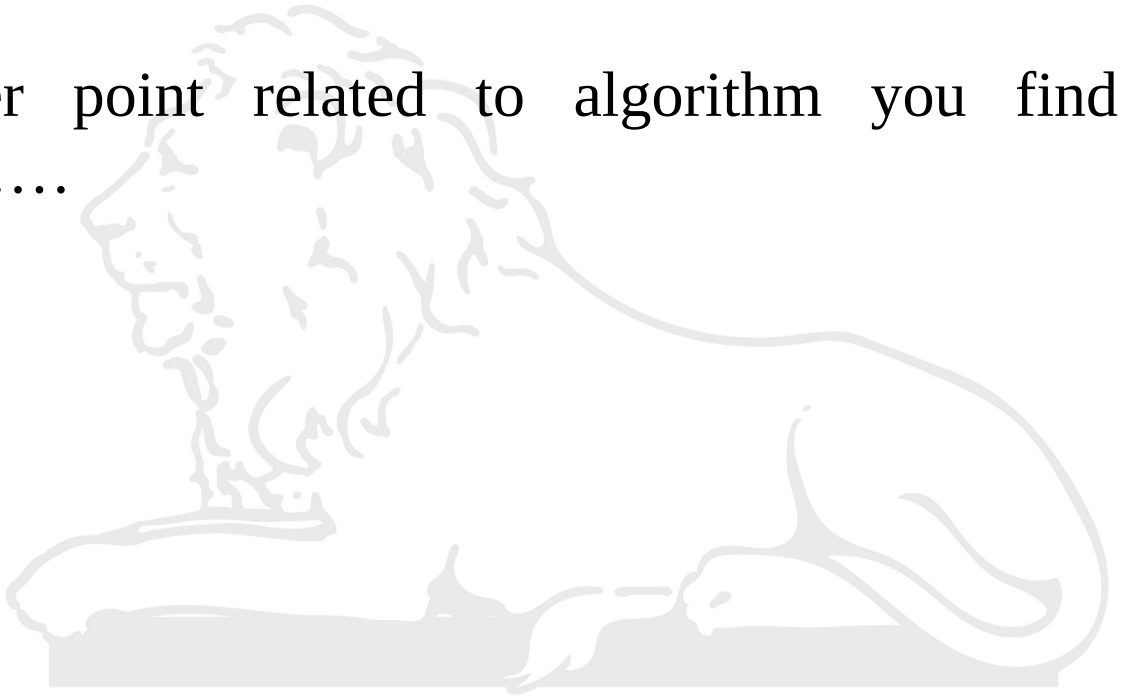

- Give precise **Problem Definition** ….
- Define **Objectives** of the work to be achieved …..

Dataset

- If any dataset is used in the work, describe the dataset and source of the data.
- Statistics related to data (*e.g.*, Number of instances)
- If dataset is created by the group, chart the process.
- Any other relevant point related to data

Algorithm

- Describe the algorithm (or technique) implemented.
- A flow chart or pseudocode or any other compact mode will be good.
- Any other point related to algorithm you find suitable to mention……

Experimental/Simulation Setup

- If any standard tool is used, refer it.
- Describe the parameters (if any) used while simulation.
- How the tuning of parameters are performed?
- ……
- Or points relevant to experimental settings of your project.

Results

- Present results in table format. If comparison is done with other methods, present the results in an easily readable comparative manner.

OR

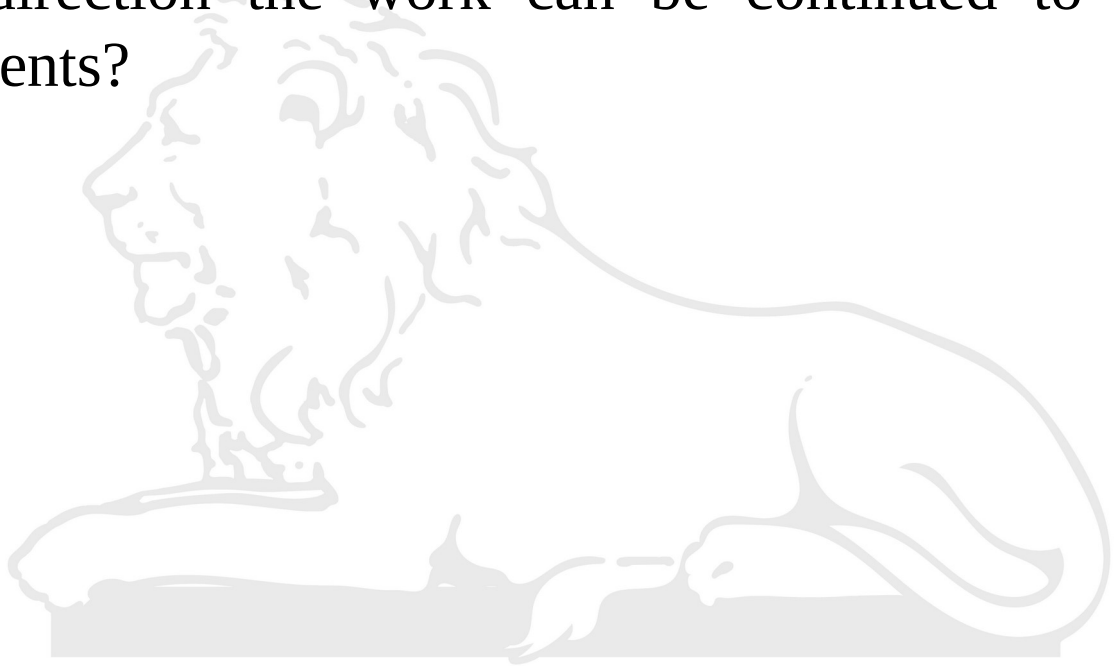

- Present results in bar graphs. If comparison is done with other methods, present the results in an easily readable comparative manner.

OR any other standard format.

- Theoretical justification in support of results based on your understanding irrespective of success or failure.

Conclusion and Future Work

- Provide conclusive points on overall work done in the project.
- ……
- In what direction the work can be continued to make further improvements?

Contribution of Group Members

- <Member-1 Name>: <Contribution Details>
- <Member-2 Name>: <Contribution Details>
- <Member-3 Name>: <Contribution Details>
- <Member-4 Name>: <Contribution Details>

Publications/Patents in IEEE format

- Add here conference/Journal/White Paper/Patent published related to the project work (Should be in IEEE Format, sample is given in the next slide).

References

IEEE Format for all types of publicaitons:

- Journals
